PERSONAL STATEMENT

I am a skilled and results-driven Flutter Developer with a strong background in building cross-platform mobile applications using Flutter and Dart. I specialize in creating clean, user-friendly interfaces and integrating complex backend systems through APIs and databases. My passion lies in delivering high-quality, efficient and scalable mobile solutions. I take pride in writing clean, maintainable code and continuously improving my skills. I thrive in collaborative, fast-paced environments and enjoy working with cross-functional teams to bring ideas to life through technology.

KEY SKILLS

State Management	SQLite	Figma
UI/UX Design	Git	Agile Methodologies
API Integration	Testing & Debugging	App Deployment

EXPERIENCE

Flutter Developer

SysQube Technology, Nepal

- Designed and developed cross-platform mobile applications using Flutter, delivering responsive, high-performance experiences across both iOS and Android platforms.
- Integrated RESTful APIs and third-party services to enable real-time data access and enhance overall app functionality.
- Optimized application performance and reduced load times through efficient coding practices, effective state management, and asynchronous programming techniques.
- Implemented unit and widget testing to ensure code reliability, maintain high test coverage and support long-term maintainability.
- Collaborated within Agile development teams, actively participating in sprint planning stand-ups and reviews to ensure timely delivery of features and milestones.

PROJECTS

myFarm - E-commerce App for Farming & Gardening

A full-featured shopping app tailored for farmers and gardeners, offering tools, seeds and personalized product recommendations.

- Built wishlist, cart, and multi-address delivery systems with cash on delivery support.
- Integrated product recommendation engine based on user purchase history.
- Implemented dark mode, profile editing, and search functionality for a streamlined UX.

Myagde Gaubikash - Community Information & Services Platform

An informational app designed for rural residents to access essential services, city notices, and local administrative resources.

- Integrated secure login and user roles for personalized access.
- Developed modules for education, employment, complaints, digital demographics, and emergency contacts.
- Focused on accessibility and ease of navigation for users in low-tech literacy areas.

Random Password Generator – Secure Password Manager App

A customizable password generator and secure password manager to help users generate and manage credentials locally.

- Built a password generator with toggleable options for symbols, numbers, and case sensitivity.
- Enabled saving, editing, and deleting passwords with metadata like website, username/email, and emoji icons.
- Ensured secure local data storage and smooth user interaction through minimal UI.

NewsAPI – News Aggregator App

A sleek and responsive mobile app that delivers BBC news in real time, organized into categories with a user-friendly interface.

- Developed dynamic UI featuring a horizontal top-news carousel and scrollable category tabs.
- Implemented state management and local storage for performance and persistence.
- Enabled dark mode toggle, article bookmarking with Snackbar feedback, and full article viewing via in-app browser.

Ingredient List – Personal Bakery Ingredient Tracker

A simple, personal-use app designed to keep track of ingredients specifically for baking.

- Created a custom list of essential bakery items with quantities recorded in kilograms and grams.
- Designed for quick access and easy updates, supporting daily baking routines.
- Focused on minimal interface and offline functionality to support use in the kitchen without distractions.
